SHIVANK KATIYAR

MERN Stack Developer | React.js | Full-Stack Web Developer | BCA Final Year

katiyarshivank927@gmail.com | +91 9956208289 | Delhi, India | GitHub | LinkedIn | Portfolio ↗

PROFESSIONAL SUMMARY

MERN Stack developer and BCA final-year student who has freelanced, shipped, and sold a live React web application to a real client. Currently building a QR-based restaurant ordering system with Firebase Firestore, real-time order management, and a secure admin dashboard. Experienced in QA testing across 3 production releases. Certified by Deloitte, Tata iQ, Cisco, and AICTE.

TECHNICAL SKILLS

Frontend	React.js (JSX, Hooks, React Router), JavaScript (ES6+), HTML5, CSS3, Bootstrap, Responsive Design
Backend	Node.js, Express.js, REST APIs, Firebase (Firestore, Auth), Protected Routes, Routing
Database	MongoDB, Firebase Firestore, MySQL
Dev Tools	Git, GitHub, Vercel (Deployment), Postman, Figma, VS Code, npm
Testing	Manual Testing, Test Case Design, Regression & Usability Testing, Bug Reporting

WORK EXPERIENCE

Freelance Web Developer · Self-Employed *2024 – Present*

- Designed, developed, and deployed FlexxWell — a live React.js gym landing page with QR-based customer acquisition flow: customers scan QR → visit landing page → click Join → complete a Google Form to book a free demo session.
- Sold and delivered the product to a real gym owner client; application is live on Vercel and actively used for lead generation and demo session bookings.
- Handled the full project lifecycle independently: client requirement gathering, UI/UX design in Figma, React development, Vercel deployment, and client handover.

QA Testing Intern · HyperCloud Digital Solutions *Jul – Oct 2025*

- Designed and executed 100+ manual test cases (functional, regression, usability, compatibility) across 3 successful production software releases.
- Collaborated with developers in bug triage, verified fixes, and maintained a structured defect log that improved team release confidence and reduced post-launch issues.

PROJECTS

QR-Based Restaurant Ordering System 🚧 **In Progress** *React · Firebase · Firestore · Auth · Admin Dashboard* **[GitHub]**

- Building a full-stack QR ordering platform — customers scan table QR → browse live menu → place orders synced instantly via Firebase Firestore; no page refresh required.
- Admin dashboard provides real-time order queue, status controls, menu management, and a protected portal secured with Firebase Authentication and React Router guards.

FlexxWell — Gym Client Acquisition Platform *React.js · Vercel · Google Forms · QR Flow* **[GitHub] [Live ↗]**

- Production React landing page built and sold to a gym owner; QR code drives offline foot traffic to an online demo booking flow — converting walk-ins into confirmed leads via Google Form integration.
- Optimized for mobile-first UX (primary use case: scanning QR on phone), fast load time on Vercel CDN, and a clean UI designed to maximize form conversion rate.

Library Management System *Python · MySQL · OOP* **[GitHub]**

- Desktop CRUD application with book cataloging, member management, and issue/return tracking; parameterized SQL queries to prevent injection vulnerabilities.

EDUCATION

Bachelor of Computer Applications (BCA)	Galgotias University	*2023 – 2026*
Class 12th — CBSE	GD Goenka Global School, Noida	*2022 – 2023*

CERTIFICATIONS

Python Full Stack Developer — EduSkills/AICTE · Data Analytics Simulation — Deloitte Australia · GenAI Powered Analytics — Tata iQ · CCNA: Intro to Networks — Cisco · Technology Simulation — Deloitte · Data Analysis — Simplilearn
